OUR FAITH IN THE PLANET

## Silent Fields: The long decline of a nation's wildlife by Roger Lovegrove

### EcoJudaism Overview

Over years of research, Lovegrove studies parish records across Britain to uncover the hunting and poisoning of species classified for centuries as vermin, including many of our most beautiful birds and mammals, including kingfishers, red kites, sea eagles, otters and beaver. This chastening book makes it clear why Britain is one of the most wildlife depleted countries in the world. A great spur to making reparation. – *Rabbi Jonathan Wittenberg*
